

NEW!

BalanceBox® PowerPack

Go Cordless! Power - Anytime, Anywhere.

The BalanceBox PowerPack is an innovative solution providing off-grid mobile power for interactive displays in almost any location. Black-outs and long power leads are a thing of the past, keep working uninterrupted or off-grid, leveraging the full potential of your touch panels in totally new and creative ways! The new PowerPack can be used with the trusted BalanceBox and e-Box products.

Explore New Environments

No need to worry about tripping over the power leads, use your touchpanel in any location in your classroom or business. Roll it on to the museum patio or basketball pitch and add new dimensions to your teaching and coaching.

Expand your flexibility: go cordless!

Depending on the panel size you get up to 3 hours of off-grid presentation power. Recharge while you use the panel, unplug and move it around to make a break-out session. Discover the flexibility and freedom of the BalanceBox PowerPack.

Presentation power in remote locations

Improve your communication on site in firefighting or emergency briefings. Visualization power may win the game or even save lives in stressful environments.
