

e-Box III Mobile Stand

Move. Adapt. Engage. Built for Flexible Learning & Collaboration.

The e-Box® III Mobile Stand is a motorized height-adjustable mount that brings true mobility to (interactive) displays, delivering the flexibility modern learning and working environments demand.

With fast powered movement, a 650 mm height range and large 100 mm wheels, you can position your touchpanel wherever collaboration happens: classrooms, meeting rooms, breakout areas or training spaces.

Its stable dual-column frame and 140 kg capacity support even the largest panels, while the dual anti-collision system ensures safe operation in busy environments. Smooth, safe height adjustment means everyone can participate, whether presenting, running a teleconference or using a wheelchair.

The spacious Top-Box keeps cables tidy and houses a mini-PC or media device, with an optional lockable cover for secure, professional storage. The included VESA 800 × 600 mm bracket ensures broad compatibility across display brands and sizes.

Mobile flexibility. Powered adjustability. Safe, stable performance. The e-Box® III Mobile enables seamless collaboration wherever you need it.
