e·Box IV Wall Mount

Faster. Smarter. Stronger.
Designed for Modern Learning & Collaboration.

The e·Box® IV Wall Mount is designed to meet the demands of modern classrooms and meeting spaces, where (interactive) displays must be accessible, safe, and easy to use for everyone. With fast, reliable motorized height adjustment, it ensures optimal ergonomics for presenters, teachers, and users of all heights.

Its wide-stance double-column design delivers exceptional stability, even with large-format touch panels. Combined with a double anti-collision safety system, the e·Box® IV offers dependable performance and peace of mind in everyday use.

With an extended 980 mm height range and high-speed motor columns, displays can be positioned smoothly and precisely at the touch of a button. Installation is quick and efficient thanks to one-piece height- and depth-adjustable wall brackets, reducing setup time and complexity.

The modular design allows the e·Box® IV to grow with your needs. Fully compatible with accessories such as the Winx whiteboard frame and an optional floorplate, it is easy to configure for classrooms, meeting rooms, training environments, or large-scale deployments.

Reliable performance. Effortless motion. Built to scale.
The e·Box® IV Wall Mount delivers a versatile, future-ready height-adjustable motorized solution for everyday professional display applications.
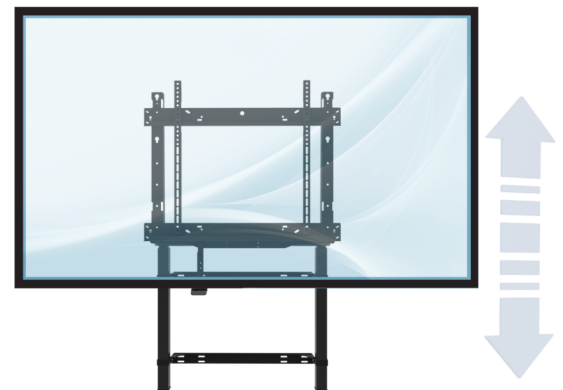

Smooth, fast height adjustment
